SERVICE OVERVIEW

VIRTUAL AI OFFICER: Virtual Artifical Intelligence Officer (vAIO) Service

Why do you need a vAIO?

The rate of AI adoption for organizations continues to increase.

Many leaders find themselves unable to bridge the gap between opportunity and execution, securely.

As AI adoption accelerates, many companies are unsure how to extract real value from it. Advising on executive-level AI governance and strategic oversight, a vAIO enables organizations to harness AI's transformative potential while avoiding the pitfalls that derail less disciplined approaches.

Our sought-after service provides leaders access to senior AI expertise, helping align technology investments with clear business goals - whether that's driving growth, enhancing customer experience, or increasing operational efficiency. And all without the cost or time needed for a full-time executive hire.

With built-in oversight on compliance, ethics, and data security, our vAIOs helps organizations move faster, with less risk.

How can our Virtual AI Officer Service save your business money?

- By providing expert oversight from the start, our vAIO helps prevent failed AI initiatives that often result from poor alignment, weak governance, or compliance missteps.

- Avoiding wasted time on trial-and-error implementations. Faster integration and smarter prioritization of AI projects lead to quicker returns, freeing up budget for reinvestment.

- Organizations get on-demand access to senior AI strategy and governance expertise. This flexible model delivers executive-level value at a fraction of the cost.

Our Approach

Our Virtual AI Officer Services (vAIO) can be delivered as a standalone engagement or as part of a budled strategy.

Core service areas include:

Strategic AI Assessment: Current state review, use case discovery, and readiness evaluation.

AI Governance Design: Policies, ethical frameworks, and compliance planning.

Program Design & Roadmapping: Business-aligned AI roadmaps and lifecycle planning.

Executive Advisory: Ongoing guidance for leadership teams and boards.

Cross-Domain Integration: Alignment with Security, Data, Cloud, and Experience teams.

Training & Leadership: Custom sessions, speaking engagements, and access to AI playbooks.
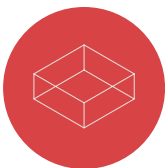

Our Team

Cross-functional expertise delivers a balanced and impactful result.
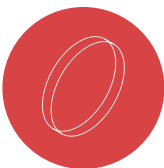

Each member brings a critical layer for delivering AI responsibly and effectively to your organization.
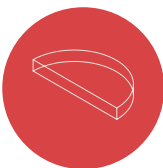

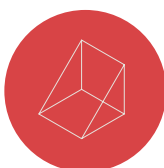

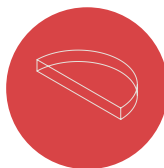

LEAD ADVISOR

DATA ARCHITECT

AI ENGINEER

CHANGE MANAGEMENT

CYBERSECURITY SME

ENGAGEMENT MANAGER

At the core is the vAIO Lead Advisor, who works directly with executive teams to shape AI vision, establish governance, and align initiatives with business outcomes. Supporting this leadership is a Data Architect who ensures systems and data pipelines are AI-ready, and an AI Engineer

who oversees technical delivery - from fine-tuning models to managing performance. A Cybersecurity SME reinforces trust by embedding risk and compliance controls, while a Change Management Lead drives adoption through training and stakeholder engagement.

Rounding out the team, an Engagement Manager ensures seamless coordination and visibility across all stages of delivery. Together, this team offers the strategy, execution, and oversight needed to deploy AI safely and at scale.
