

ADVISORY SERVICES: Cloud Advisory Services

Cloud Migration Assessment Service

Online Business Systems believes that successful cloud transformations begin with a clear path towards the desired outcomes, guided by the right combination of technical and functional expertise.

Although each cloud transformation is unique to each organization, the approach to defining the path forward doesn't have to be.

As part of Online's Digital Transformation practice, we provide practical help for our Clients to successfully leverage the cloud.

When it comes to cloud migration, knowing where to begin is often the most challenging question.

- > Of all the technologies used today, which are the best candidates for cloud migration?
- > What criteria are used to evaluate those candidate applications and how is that criteria applied?
- > What are the risks that must be known and managed when migrating?
- > Once I know the answers to the above questions, what should be done next?

Online's Cloud Advisory Services provides you with the clarity and expertise you need to successfully navigate your cloud transformation.

Designed to be practical and high-impact, our approaches utilize insights and industry expertise to assure a smooth journey and successful outcomes for your organization.

Online's Cloud Migration Assessment Services utilizes peer-reviewed academic approaches to provide peace of mind by answering these fundamental questions, equipping you with clarity and direction. Through a series of interviews and concurrent data gathering, you will be provided with a cloud migration report and mini-roadmap which will assist you in deciding which applications are candidates for successful migration and early value, getting things off to a strong start.

Cloud Change Management Impact Assessment

Cloud will increase the agility, performance, and means through which technology enables service provisioning. While this change has many benefits for end users and support staff, the transition can be difficult to navigate. Planned and active management of change is critical to the successful outcome of cloud migrations.

- > *What stakeholders will be impacted by the cloud migration and how best can they be supported in adapting successfully?*
- > *What are the needs and concerns of each stakeholder group and how best can information be provided to create greater support and alignment?*
- > *What change management risks must be monitored and actively managed to increase the probability of success and how will this be accomplished?*

Online's Cloud Change Management Impact Assessment utilizes industry research to pragmatically assess change readiness, equipping you with awareness and actionable tactics to maximize change readiness and successful cloud migration outcomes.

Through a series of interviews and concurrent data gathering, you will be provided with a change readiness report which will assist you in preparing for and managing the change effectively ensuring that your cloud migration is change ready and maximized for success.

In addition to the above service offerings, Online offers consulting services which are tailored to unique and emerging needs, drawing on the expertise of our Digital Transformation and Cybersecurity professionals across North America.
